Preformed elbow by seams & darts

ACID LIME-6933

NAUTILAL BLUE-7570

MEDITERANEEN-8880

ACID CITRUS-8876

FABRIC	91% Polyamide, 9% Elastane
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	700 g

FEATURES

Very complete jacket, developed with our professional mountaineering "Friends", which incorporates all the technical features required by climbers and mountaineers. The Mauna Kea Jacket uses a "4 way stretch" (multi-elastic) Shelltec Active Flex (20k/20k) fabric to offer maximum protection in very adverse weather conditions.

Specifications

- Very strong recycled polyamide fabric.
- Waterproof and breathable thanks to the Shelltec Active Flex membrane (20k/20k).
- Ergonomic design for exceptional freedom of movement.
- Compatible and fully adjustable for use with a mountaineering helmet.
- Long neck protection for maximum facial protection in storms.
- Articulated elbows.
- Slightly longer back for added protection in bad weather.
- Two map-sized zipped water-repellent hand warmer pockets positioned for accessibility when using a harness.
- Interior flap behind the front central zip for protection against storms.
- Detachable snow skirt to prevent snow from entering.
- Soft and napped microfleece in the area of the mouth and chin.
- Two large mesh interior pockets for glasses, gloves or small bottles.
- Water-repellent underarm zips for ventilation.
- Velcro cuff adjustment, compatible with winter gloves.
- Regular fit.
- Adjustable hem with cord lock.
- Fabric with PFC-free water-repellent treatment.
- Bluesign certified fabrics.

MAUNA KEA PT M 1274026

Adjustable waistband by welded placket
 + removable suspenders
 - Welded loop
 - Welded placket + inserted large velcro

WELDED Fly closed by 1 hook snap button
 + 1 hidden snap button under
 + matching zipper coil 3

HAND POCKETS :
 Contrasted bonded & laser cut
 reversed WR zipper coil 3
 + bonded preformed zipper garage

SIDE POCKET : Contrasted bonded & laser cut
 WR zipper coil 3 + bonded preformed zipper garage
 + flat pleat (welded edge 1 cm)

Inleg gusset

Preformed knees by seams & darts

Side opening / Venting :
 WR injected zipper N°5 (Double sliders)
 Contrasted teeths & tape

Reinforcement (no inleg seam on this part)

Welded placket + velcro

Inside gaiter with hook

GRASS LIME-7575

MEDITERANEEN-8880

DEEP GINGER-7577

FABRIC	91% Polyamide, 9% Elastane

- Adjustable hem with cord lock.
- Cuffs with interior elastic.

NECTARINE-6268

MEDITERANEEN-8880

ACID CITRUS-8876

SHELL, LINING	100% Polyamide
PADDING	100% Polyester
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	620 g

FEATURES

Very lightweight hooded jacket with PrimaLoft Gold Luxe insulation. Designed for fast-moving winter activities. Filled with 250 g of PrimaLoft Gold Luxe, the highest performance synthetic insulation available. It combines incredible packability and softness that imitates goose down, all with excellent water repellency for protection against wet weather. Top quality and high thermal capacity. Perfect for high intensity winter activities where weight is a major factor.

With an exterior made of water-resistant Pertex Quantum fabric (PFC-free DWR) and on the inside as a lining a lightweight and hard-wearing 10D Microshell fabric. Very compressible and completely windproof and breathable.

Specifications

- Regular fit.
- Ergonomically designed to offer exceptional freedom of movement.
- Pertex Quantum outer fabric.
- 10D recycled Microshell interior fabric.
- Filled with 250 g of PrimaLoft Gold Luxe, the highest performance synthetic insulation available.
- Integrated hood also filled with PrimaLoft Gold Luxe and compatible with the use of a helmet.
- Two pockets for the hands with YKK zips.
- Adjustable hem with cord lock.
- Cuffs with interior elastic.
- PFC-free DWR.
- All the fabrics are recycled from the recycling of post-consumer plastic bottles.
- The fabrics are Bluesign certified.

SHARPU 2.0 JKT M 1644025

NAUTICAL BLUE-7570

BLACK-9937

SHELL, LINING	100% Polyamide
PADDING	100% Polyester
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	480 g

FEATURES

Very lightweight jacket ideal for use as a second layer or as an outer layer in favourable conditions. With an exterior made of recycled water-resistant Pertex Quantum fabric (PFC-free DWR) and with a lightweight and hard-wearing recycled 10D polyamide lining on the inside. The interior insulation consists of 80 g of PrimaLoft Gold P.U.R.E. technology insulation, which offers a high degree of insulation even in wet conditions using a new manufacturing technology based on air instead of the heat of an oven to produce the PrimaLoft insulation. As a result, a significant reduction in carbon emissions is achieved. Very lightweight and compressible, can be stored in its own pocket and is totally windproof and breathable.

Specifications

- Regular fit.
- Ergonomically designed to offer exceptional freedom of movement.
- Pertex® Quantum recycled outer fabric.
- PrimaLoft gold P.U.R.E. technology.- Offers a high degree of insulation even in wet conditions using a new manufacturing technology that achieves a significant reduction in carbon emissions.
- 10D recycled polyamide interior fabric.
- Two pockets for the hands with YKK zips located for accessibility when using the harness.
- Adjustable hem with cord lock.
- Elasticated cuffs.
- PFC-free DWR.
- All the fabrics are recycled and come from the recycling of post-consumer plastic bottles.
- The fabrics are Bluesign certified.

JUGAL JKT M 1643770

- High wind resistance.
- Highly water resistant.
- Very breathable.
- Warm.
- Articulated pattern for greater freedom of movement.
- Hood compatible for use with helmet and 3D adjustable.
- Cuffs with soft elastic fabric.
- Two pockets with zips for the hands.
- Adjustable hems with elastic drawstring.

FABRIC	93% Polyester, 7% Elastane
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	520 g

FEATURES

Hooded men's jacket made of bi-elastic, napped Storm fleece fabric. High wind resistance. Highly water resistant. Passes rain test (AATCC 35). Very breathable. Air permeability is 10.4 (ASTM D737). PFC-free DWR. Very comfortable, warm and breathable. Articulated pattern for greater freedom of movement. Hood compatible for use with helmet and 3D adjustable. Cuffs with soft elastic fabric. Two pockets with zips for the hands. Adjustable hems with elastic drawstring. Bluesign approved fabric.

- Very resistant
- Warm and breathable
- Ergonomically designed for super-fluid movement
- 2 front hand pocket
- 1 cargo pocket
- Adjustable waist with velcro
- Hem armortex reinforcement
- Zip adjustable hem to use with wider boots.
- Inner detachable gaiter

NAUTICAL BLUE-7570

BLACK-9937

FABRIC	58% Polyamide, 32% Wool, 10% Elastane
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	430 g

FEATURES

Technical regular fit pants for serious mountain activities—made with Shellstretch pro wool, a blend of a durable 4 way stretch recycled nylon coming from the recycling of fishing nets (red-cycle project) on the outside and 30% merino wool on the inside that provides perfect moisture and temperature regulation. The natural fibers wick up moisture, transporting them to the outside so that the inside stays dry and comfortable on the skin.

Specifications

- Regular fit
- Very resistant
- Warm and breathable
- Ergonomically designed for super-fluid movement
- 2 front hand pocket
- 1 cargo pocket
- Adjustable waist with velcro
- Hem armortex reinforcement
- Zip adjustable hem to use with wider boots.
- Inner detachable gaiter
- Recycled nylon (red-cycle project)
- PFC free DWR
- Bluesign approved fabrics

ACID CITRUS-8876

SHELL, LINING	100% Polyamide
PADDING	100% Polyester
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	570 g

FEATURES

Very lightweight hooded jacket with PrimaLoft Gold Luxe insulation. Designed for fast-moving winter activities. Filled with 250 g of PrimaLoft Gold Luxe, the highest performance synthetic insulation available. It combines incredible packability and softness that imitates goose down, all with excellent water repellency for protection against wet weather. Top quality and high thermal capacity. Perfect for high intensity winter activities where weight is a major factor.

With an exterior made of water-resistant Pertex Quantum fabric (PFC-free DWR) and on the inside as a lining a lightweight and hard-wearing 10D Microshell fabric. Very compressible and completely windproof and breathable.

Specifications

- Regular fit.
- Ergonomically designed to offer exceptional freedom of movement.
- Pertex Quantum outer fabric.
- 10D recycled Microshell interior fabric.
- Filled with 250 g of PrimaLoft Gold Luxe, the highest performance synthetic insulation available.
- Integrated hood also filled with PrimaLoft Gold Luxe and compatible with the use of a helmet.
- Two pockets for the hands with YKK zips.
- Adjustable hem with cord lock.
- Cuffs with interior elastic.
- PFC-free DWR.
- All the fabrics are recycled from the recycling of post-consumer plastic bottles.
- The fabrics are Bluesign certified.

PALE MINT-4692

Bluesign® approved fabric

STORMFLEECE® PRO

FABRIC	89% Polyester, 11% Elastane
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL

FEATURES

The new EHUN MILAK 2.0 JKT is a jacket created by TERNUA's internal development team, after gathering all the feedback and suggestions from a large number of participants in the legendary EHUN MILAK mountain race.

It is a highly technical garment, yet very versatile, as it is made with the innovative STORM FLEECE PRO® fabric, which offers benefits similar to those of a laminated softshell. It provides excellent wind protection and water resistance without a membrane, while also delivering great breathability during various activities, whether aerobic or static. All of this comes with exceptional freedom of movement and comfort, thanks to its 4-way stretch fabric.

It includes a multitude of technical details to meet many of the user's needs during activity:

- Two large zippered hand pockets with dual functionality: • Storage or extra ventilation if needed. • Adjustable hood and hem with ultralight drawcords. • Elastic panel on the front, under the visor, securing the hood and reducing its movement during activity. • Very elastic and comfortable Lycra cuffs, with a thumb hole for an extra snug fit. • Chest adjustment system to allow ventilation when needed, without fully opening the jacket. • Side zippered pocket for carrying a phone or other items. • Double interior pocket with large storage capacity. • Very durable fabric with high abrasion resistance. • Highly breathable. • Wind Resistant (CFM<25, ASTM D737).
- Passes the Rain Test (AATCC 35). • PFC-free DWR (Durable Water Repellent) treatment. • BLUESIGN® certified fabric. • Polyester made from post-consumer recycled plastic bottles.

BLACK-9937

FRONT & BACK FABRIC	100% Polyester
HOOD & BE-LOW FABRIC	94% Polyester, 6% Elastane
FIT	Slim
SIZES	EU S-3XL US/CA XS-XXL

FEATURES

The new SPIKE HYBRID jacket is engineered around the three core principles of the ADRENALITE line: Lightness, performance, and freedom of movement. Constructed entirely from recycled materials, the strategic combination and placement of fabrics ensure optimal thermal insulation and wind protection where needed, using ultralight 15D ripstop fabric filled with 100g Primaloft Gold Insulation Luxe. Simultaneously, areas requiring greater mobility, reduced thermal retention, and enhanced breathability during high-intensity activities are crafted with Warmshell fabric on the sides, part of the back, hood, underarms, and waist. This sophisticated design results in an innovative jacket that excels in a variety of outdoor activities, providing effective cold protection while managing excess heat and ensuring breathability. Its versatility makes it suitable for nearly year-round use, depending on activity and environment, and its lightweight and compact nature enhance portability.

- Hidden windproof construction at the front neck area.
- Slim fit for an athletic silhouette.
- Hood designed to be worn under a helmet if necessary.
- Two large zippered hand pockets.
- Three internal pockets, including one in Power Mesh.
- Recycled and antibacterial Warmshell on sides, hood, and waist.
- Microshell made from recycled polyester, 20D and 45 g/m².
- All fabrics feature PFC-free durable water repellent (DWR) treatment.
- Fabrics are Bluesign or Oeko-Tex certified.

All of this comes with exceptional freedom of movement and comfort, thanks to its 4-way stretch fabric.

It includes a multitude of technical details to meet many of the user's needs during activity:

- Two large zippered hand pockets with dual functionality: • Storage or extra ventilation if needed. • Adjustable hood and hem with ultralight drawcords. • Elastic panel on the front, under the visor, securing the hood and reducing its movement during activity. • Very elastic and comfortable Lycra cuffs, with a thumb hole for an extra snug fit. • Chest adjustment system to allow ventilation when needed, without fully opening the jacket. • Side zippered pocket for carrying a phone or other items. • Double interior pocket with large storage capacity. • Very durable fabric with high abrasion resistance. • Highly breathable. • Wind Resistant (CFM<25, ASTM D737).
- Passes the Rain Test (AATCC 35). • PFC-free DWR (Durable Water Repellent) treatment. • BLUESIGN® certified fabric. • Polyester made from post-consumer recycled plastic bottles.

SPIKE HYBRID JKT W 1644320

New

BLUE MINT-1357

BLACK-9937

FRONT & BACK FABRIC	100% Polyester
HOOD & BELT FABRIC	94% Polyester, 6% Elastane
FIT	Slim
SIZES	EU S-3XL US/CA XS-XXL

FEATURES

The new SPIKE HYBRID jacket is engineered around the three core principles of the ADRENALITE line: Lightness, performance, and freedom of movement. Constructed entirely from recycled materials, the strategic combination and placement of fabrics ensure optimal thermal insulation and wind protection where needed, using ultralight 15D ripstop fabric filled with 100g Primaloft Gold Insulation Luxe. Simultaneously, areas requiring greater mobility, reduced thermal retention, and enhanced breathability during high-intensity activities are crafted with Warmshell fabric on the sides, part of the back, hood, underarms, and waist. This sophisticated design results in an innovative jacket that excels in a variety of outdoor activities, providing effective cold protection while managing excess heat and ensuring breathability. Its versatility makes it suitable for nearly year-round use, depending on activity and environment, and its lightweight and compact nature enhance portability.

- Hidden windproof construction at the front neck area.
- Slim fit for an athletic silhouette.
- Hood designed to be worn under a helmet if necessary.
- Two large zippered hand pockets.
- Three internal pockets, including one in Power Mesh.
- Recycled and antibacterial Warmshell on sides, hood, and waist.
- Microshell made from recycled polyester, 20D and 45 g/m².
- All fabrics feature PFC-free durable water repellent (DWR) treatment.
- Fabrics are Bluesign or Oeko-Tex certified.

CYCLONE PRO JKT W 1644272

New Colors

DARK STONE-7566

LIGHT MAGMA-2222

FABRIC	100% Polyamide
FIT	Regular
SIZES	EU XS-XXL US/CA XXS-XL
WEIGHT	170 g

FEATURES

Very lightweight technical jacket made with our SHELLTEC ACTIVE FLEX technology, waterproof, breathable, resistant, and highly compressible. Its pre-formed pattern and bi-elastic fabric offer good freedom of movement and comfort during use. The CYCLONE PRO is your ideal companion for all kinds of outdoor activities, mainly aerobic, where the protection/lightness ratio is key.

- Eco-designed jacket to be circular, using recycled, monomaterial fabric, and at the end of its life, it is recyclable.
- Thermosealed seams and water-resistant zippers.
- Water column of 20,000 mm.
- Breathability of MVP 20,000 g x m² x 24h.
- Water-resistant front zippers.
- Hood with a wide range of adaptability thanks to the side elastics.
- Elastic panel for hood support and wind protection on the forehead under the visor.
- Chest adjustment system to allow ventilation when necessary, without fully opening the jacket.
- Adjustable hem with ultralight toggle.
- Elastic cuffs.
- Reflective prints to improve visibility.
- PFC-free water repellent treatment.
- Fabrics with BLUESIGN® certification.
- Fabric: 20D Nylon Stretch, 60 gr/m² recycled (post-industrial).
- Integrated compression bag in the jacket for transport/storage

BLACK/AZALEA-2717

SHELL, LINING	100% Polyamide
PADDING	100% Polyester
FIT	Regular
SIZES	EU XS-XXL US/CA XXS-XL
WEIGHT	145 g

FEATURES

The Agile Skirt shorts provide an additional insulating layer resistant to wind and water for activities such as mountain skiing and Nordic skiing. With an exterior made of recycled water-resistant Pertex Quantum fabric (PFC-free DWR) and with a lightweight and hard-wearing recycled 10D polyamide lining on the inside. The interior insulation consists of 80 g of PrimaLoft Gold P.U.R.E. technology insulation, which offers a high degree of insulation even in wet conditions using a new manufacturing technology based on air instead of the heat of an oven to produce the PrimaLoft insulation. As a result, a significant reduction in carbon emissions is achieved. Side openings with zips ensure they can be put on and taken off quickly during your activity. Specifications: • Regular fit. • Pertex® Quantum recycled outer fabric. • PrimaLoft Gold P.U.R.E. technology offers a high degree of insulation even in wet conditions using a new manufacturing technology that achieves a significant reduction in carbon emissions. • 20D recycled polyester interior fabric. • Side openings with zips that ensure they can be put on and taken off quickly during your activity. • Elasticated waist adjustable with elastic drawstring and cord lock. • PFC-free water-repellent treatment. • All the fabrics are recycled from the recycling of post-consumer plastic bottles. • The fabrics are Bluesign certified.

RAGGER 1/2 ZIP M 1208303

New Colors

AUTUMN LEAF-1355

WHALES GREY/AUTUMN LEAF-1386

BLUE MINT-1357

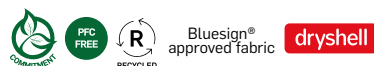

PASTEL OLIVE-1261

FABRIC	93% Polyester, 7% Elastane
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	325 g

FEATURES

Multi-activity second layer with half-length zip, made in a new, more elastic version of the DRYSHHELL fabric and with a jacquard honeycomb structure to offer greater heat capacity. The fabric is RECYCLED and it is also very breathable and quick drying. Ideal for use throughout the year. Both the fabric and the athletic pattern provide excellent freedom of movement.

- Patch pockets on the sleeves to store small gadgets.
- Flat seams.
- YKK FLAT VISLON zips for quicker closing.
- Chin protector to prevent rubbing against the zip.
- Hems and hood finished with elastic trim.
- Good resistance to pilling.
- PFC-free water-repellent treatment (DWR).
- BLUESIGN® certified fabric.
- Polyester from the post-consumer recycling of plastic bottles.

DEEP GINGER/AUTUMN GLORY-1396

FABRIC	93% Polyester, 7% Elastane
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	290 g

FEATURES

Multi-activity second layer with an extra-long half-length zip that combines two recycled WARMSHELL fabrics that are light, warm, breathable and quick-drying. The elasticity of the fabrics, construction and athletic pattern provide excellent freedom of movement, and the longer than usual front half-length zip makes it easy to put on and offers extra ventilation when necessary.

- Chin protector to prevent rubbing against the zip.
- Very good resistance to pilling.
- S.Café® treatment to control odours, improve drying and protect from UV rays.
- Structured interior surface to optimise sweat extraction and increase thermal insulation.
- PFC-free water-repellent treatment (DWR).
- BLUESIGN® certified fabric.
- Polyester from the post-consumer recycling of plastic bottles.

PUNJAK 1/2 ZIP M 1208304

New Colors

PALE MINT-4692

AUTUMN LEAF-1355

WHALES GREY-5775

FABRIC	95% Polyester, 5% Elastane
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	450 g

FEATURES

Innovative second layer with extra-long half-length zip, chest pocket and hand pockets, turning it into a hybrid between a jacket and a traditional half-length zip garment, increasing the uses and activities where you can make best use of it. Its design and manufacture using the new version of the WARMSHELL PRO fabric and technology (270 g/m² and napped interior) has improved heat capacity, elasticity and recovery, improving freedom of movement. Resistance to pilling is really outstanding thanks to the very dense structure of the outer surface. If we add its optimal transporting of sweat to the outside and quick drying, the PUNJAK 1/2 ZIP is an ideal second layer for any mountain activity, both static and dynamic, primarily in cold or very cold climates. In combination with a shell, it will be a great source of heat, always staying dry, being a great regulator of body temperature.

- Pockets for the hands to use it in "jacket mode".
- Large chest zip to facilitate putting on or taking off in tight spaces or to have extra ventilation if necessary.
- Large capacity chest pocket.
- Chin protector to prevent rubbing against the zip.
- Thumb hole, preventing possible unwanted movements of the sleeve.
- Very good resistance to pilling.
- PFC-free water-repellent treatment (DWR).
- OEKO-TEX® certified fabric.
- The WARMSHELL PRO fabric comes from recycled polyester from plastic bottles.

SIZES	EU S-3XL US/CA XS-XXL

FEATURES

The LOFTER PRO HOOD JKT is the flagship of the new family of multi-fabric fleece jackets. Each fabric optimal positioning was carefully studied to achieve the best performance and comfort. This highly technical second layer is made with the new version of Warmshell Pro fabric and technology (270 g/m², brushed interior), along with Warmshell high-loft and a Warmshell hood. The new Warmshell Pro has imProved thermal capacity, elasticity, and recovery, enhancing freedom of movement. Pilling resistance is significantly enhanced due to the tightly woven structure of the outer surface. The LOFTER HOOD is ideal for any low-aerobic alpine activity, especially in cold or very cold climates. In combination with a shell, it will be a great source of warmth, staying dry and effectively regulating body temperature. • Warmshell hood: highly elastic, warm, and lightweight, perfect for wearing even under a helmet. • Warmshell high-loft: with long-pile structure for excellent breathability, exceptional thermal capacity, and comfort. • Hand and chest pockets with ample storage capacity. • Chin guard to prevent zipper chafing. • Excellent pilling resistance. • Raglan sleeves for better mobility. • PFC-free durable water repellent (DWR) treatment. • Fabrics certified by Oeko-Tex or Bluesign. • All fabrics are made from recycled polyester from plastic bottles.

FRESH DUBARRY-6929

FABRIC	95% Polyester, 5% Elastane
FIT	Regular
SIZES	EU XS-XXL US/CA XXS-XL

FEATURES

Innovative second layer with extra-long half-length zip, chest pocket and hand pockets, turning it into a hybrid between a jacket and a traditional half-length zip garment, increasing the uses and activities where you can make best use of it. Its design and manufacture using the new version of the WARMSHELL PRO fabric and technology (270 g/m² and napped interior) has improved heat capacity, elasticity and recovery, improving freedom of movement. Resistance to pilling is really outstanding thanks to the very dense structure of the outer surface. If we add its optimal transporting of sweat to the outside and quick drying, the PUNJAK 1/2 ZIP is an ideal second layer for any mountain activity, both static and dynamic, primarily in cold or very cold climates. In combination with a shell, it will be a great source of heat, always staying dry, being a great regulator of body temperature.

- Pockets for the hands to use it in "jacket mode".
- Large chest zip to facilitate putting on or taking off in tight spaces or to have extra ventilation if necessary.
- Large capacity chest pocket.
- Chin protector to prevent rubbing against the zip.
- Thumb hole, preventing possible unwanted movements of the sleeve.
- Very good resistance to pilling.
- PFC-free water-repellent treatment (DWR).
- OEKO-TEX® certified fabric.
- The WARMSHELL PRO fabric comes from recycled polyester from plastic bottles.

LIGHT MINT-1274

BLACK-9937

FRESH DUBARRY-6929

FABRIC	100% Polyester
FIT	Regular
SIZES	EU XS-XXL US/CA XXS-XL

FEATURES

Technical insulating vest, lightweight and highly compressible, designed to be circular, using recycled polyester fabrics and filling, making it mono-material and thus recyclable at the end of its life cycle. Its light weight and athletic fit make it a highly versatile garment, ideal for a multitude of outdoor activities, both dynamic and less so, in cold weather thanks to the thermal insulation and moisture control provided by the new Primaloft Gold Luxe Insulation (120g). The two outer Microshell fabrics (flat and ripstop) offer wind protection and water repellency. Abrasion resistance is enhanced in the shoulders thanks to Ripstop fabric. • Works perfectly as an outer layer or as a warm mid-layer with a shell on top. • Two large-capacity hand pockets. • Elasticated hem and armholes to prevent cold air entry and internal heat loss. • Compressible vest for easy transport in a compression sack. • Outer fabrics of 20D and 45 g/m². made from recycled bottles polyester. • Inner insulation (120 g/m²) made from recycled bottles polyester. • Total number of recycled bottles in this jacket: 10 • 20D recycled lining coming from textile waste. • PFC-free durable water repellent (DWR) treatment. • Fabrics and insulation are Oeko-Tex and Bluesign certified.

OLIVE GREEN-8872

DARK LAGOON-2457

DARK TEAL-6259

FABRIC	90% Polyamide, 10% Elastane
FIT	Slim (Asian fit available)
SIZES	EU XS-XXL US/CA XXS-XL
WEIGHT	455 g

FEATURES

Warm multi-activity technical trousers, made of recycled bi-elastic polyamide from REDCYCLE fishing nets and post-consumer material (224 g/m²). The ergonomic SLIM FIT pattern, the adjustable waist with double Velcro strip and the softness of the fabric provide an excellent level of comfort and freedom of movement. Great resistance to abrasion and very hard-wearing.

- Bi-elastic and quick-drying SHELLSTRETCH technology.
- Waist adjustment with double Velcro and belt loops.
- 4 pockets with zips (2 at the front, 1 cargo pocket and 1 back pocket).
- PFC-free water-repellent treatment (DWR).
- BLUESIGN® certified fabric.
- Fabric from the recycling of fishing nets and post-consumer waste material.

WHALES GREY/AQUA DUCK BLUE-1393

MAIN FABRIC	85% Polyamide, 10% Elastane
BACK & KNEES	fabric: 92% Polyamide, 8% Elastane
FIT	Slim
SIZES	EU XS-XXL US/CA XXS-XL
WEIGHT	455 g

FEATURES

High-performance technical trousers that combine two technologies, SHELLSTRETCH and STORMFLEECE PRO, depending on the area and its needs. The fabrics combine recycled bi-elastic polyamide yarns from REDCYCLE fishing nets and post-consumer polyamide (230 g/m²). Their ergonomic and close-fitting pattern, the adjustable waist with extra large double side Velcro, the hem opening with zip and gusset and the high performance of the fabrics make them ideal for a wide range of outdoor activities, from trekking to mountain skiing. With a very high level of comfort and freedom of movement for both aerobic and more static activities. Great resistance to abrasion and very hard-wearing.

- Bi-elastic and quick-drying SHELLSTRETCH technology.
- STORMFLEECE PRO technology on the knees and seat offering high resistance to wind (CFM<25, ASTM D737) and water, passing the rain test (AATCC 35)
- Brushed fabric interior for greater comfort and warmth and to be more pleasant to wear.
- Hem opening with zip and gusset to facilitate putting on and taking off the trousers while wearing mountaineering boots.
- Waist adjustment with extra large double Velcro and the possibility of using a belt.
- Preformed knees.
- 3 pockets with zips (2 at the front and 1 military style pocket).
- 2 invisible side zips with double function: pocket and ventilation.
- PFC-free water-repellent treatment (DWR).
- BLUESIGN® certified fabric.
- Fabric from the recycling of fishing nets and post-consumer waste material.

RUTHKE PRO TIGHT W 1341307

BLACK/GRAPEFRUIT WASHED-7247

BLACK/CANARY YELLOW - 8917

BLACK - 9937

FABRIC	90% Polyester, 10% Elastane
FIT	Slim
SIZES	EU XS-XXL US/CA XXS-XL
WEIGHT	315 g

FEATURES

New bi-material leggings/trousers. Very technical, compressible, hard-wearing, durable, windproof, highly water-resistant and breathable. The mapping of their strategically located fabrics provides protection against the elements in the front and buttock areas (STORMFLEECE PRO), while the compressible Lycra fabric improves comfort and helps evaporation of sweat in more aerobic activities.

- High waist construction for greater wearing comfort and a feeling of protection on cold days.
- Super slim pattern.
- Ergonomic and adjustable high waist with hidden interior drawstring.
- Hems adjustable with zips for easier entry and exit of the footwear.
- 2 pockets with zips (1 back pocket hidden at the waist and 1 patch cargo pocket).
- PFC-free water-repellent treatment (DWR).
- BLUESIGN® and OEKO-TEX® certified fabric.
- The STORMFLEECE PRO fabric from recycled plastic bottles is:
- Highly windproof: Wind resistant (CFM<25, ASTM D737)
- Very water-repellent: Passes rain test (AATCC 35)

COOLSHA WARM TGT W 1341367

New

BLACK-9937

FABRIC	100% Polyester
FIT	Slim
SIZES	EU XS-XXL US/CA XXS-XL

FEATURES

Technical leggings that are very elastic and warm, made from the new Warmshell (280 gr/m²). The new COOLSHA WARM is a circular garment, as it is made from recycled polyester and, at the end of its life, it can be recycled. Its comfort and pleasant use make it a perfect garment for a multitude of outdoor activities, even on very cold days thanks to its brushed interior.

- Side pocket with zipper.
- Quick drying.
- High waistband, very comfortable and adjustable with a drawstring.
- Fabrics certified by Oeko-Tex or Bluesign.
- All fabrics come from recycled polyester from plastic bottles.

Bluesign approved fabric **warmshell**

CAMPUS 2 TIGHT W 1341351

BLACK - 9937

FABRIC	95% Cotton, 5% Elastane
FIT	Slim
SIZES	EU XS-XXL US/CA XXS-XL
WEIGHT	240 g

FEATURES

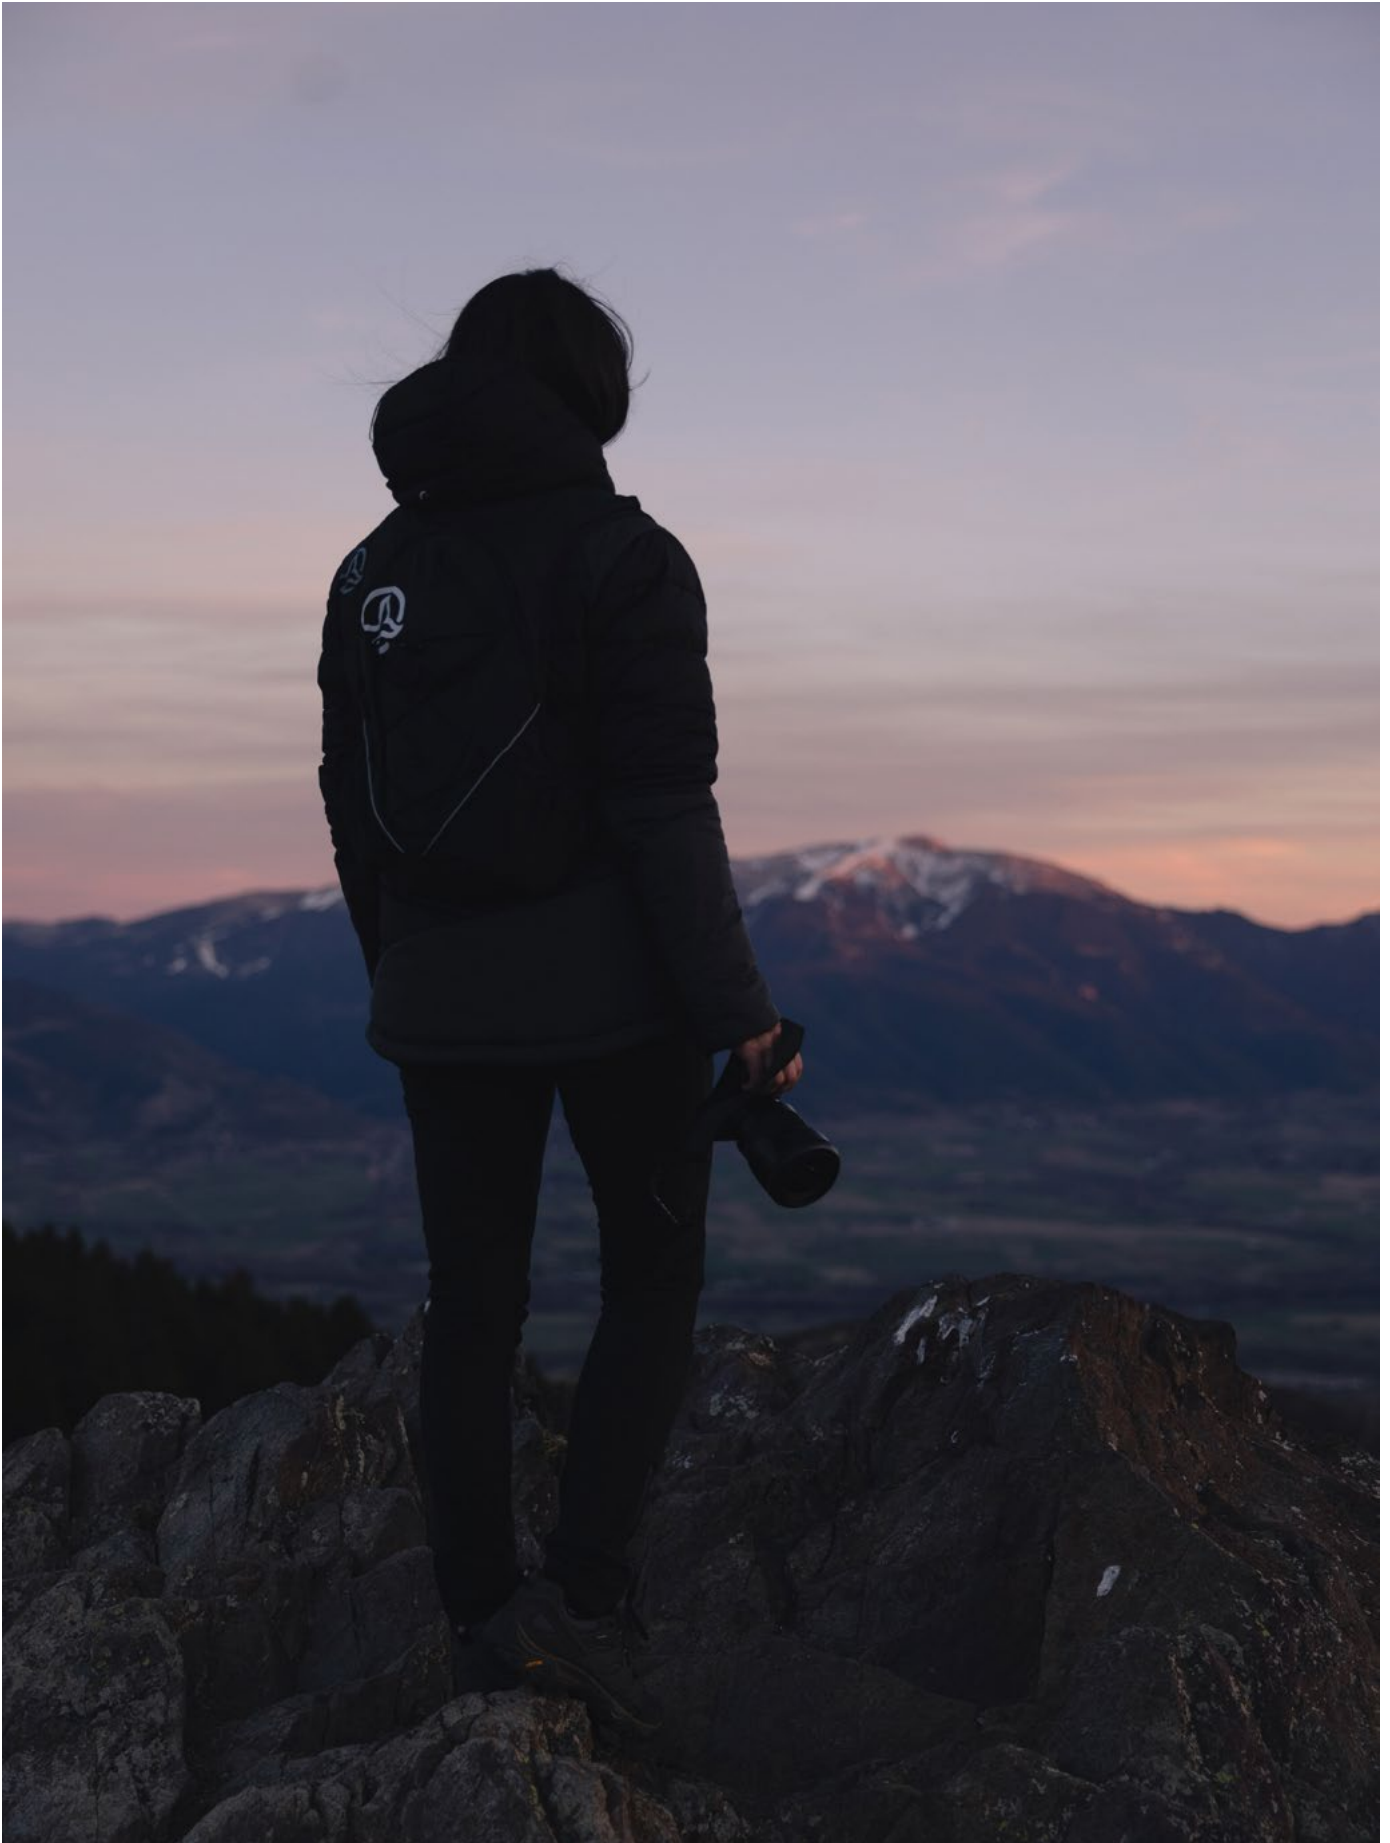

Very elastic and warm tight-fitting technical leggings made of the new WARMSHELL PRO (270 g/m²), improving heat capacity, elasticity and recovery to facilitate mobility. Really outstanding resistance to pilling has been achieved thanks to the very dense structure of the outer surface. Perfect for use in many mountaineering activities and cold or icy days.

- Quick-drying.
- Excellent resistance to pilling.
- Flat seams.
- PFC-free water-repellent treatment (DWR).
- OEKO-TEX® certified fabric.
- The WARMSHELL PRO fabric comes from recycled polyester from plastic bottles.

Oeko-Tex® approved fabric

FEATURES

The Nova Terra jacket is inspired by the jacket we developed together with our adventurer Chus Lago for her expedition to the South Pole in 2008. Chus Lago reached the South Pole after 58 days of arduous solo trekking. • We have used premium recycled materials to create a very warm, fully waterproof and windproof parka for use in very adverse climates where intense cold, rain and snow are the norm. All the materials are very pliable, which makes it pleasant to wear and gives a feeling of exceptional comfort from the first moment your put on the jacket. • Outer fabric recycled with SHELLTEC technology with PFC-FREE water-repellent treatment, free of fluorocarbons, from recycled plastic bottles. Water column: 10,000 mm/24h. Breathability: 10,000 g/m²/24h. Ultra-light-weight MICROSHHELL inner lining made of recycled polyester. Primaloft Black P.U.R.E. recycled insulation technology. Offers a high degree of insulation even in wet conditions using a new manufacturing technology that achieves a significant reduction in carbon emissions. Very good resistance to abrasion. All the seams are heat-sealed. Hood with semi-rigid visor with 3D adjustment. • Detachable synthetic fur. • 6 outer pockets with zips. • 2 inside pockets, one of them with a zip. Double slider front zip to adjust the opening according to the needs of the moment or activity. Cuff adjustment with strap. BLUESIGN® certified fabrics. • Made in Vietnam.
